ABOUT ME

An active 4th-semester Computer System student at Gunadarma University with a strong interest in Information Technology and a background in Computer and Network Engineering. Possesses fundamental knowledge in programming, networking, and microcontroller. Experienced through an internship at PT PLN (Persero) and currently serving as a Laboratory Assistant in the Information Systems Lab. Detail-oriented, communicative, disciplined, and highly responsible.

HARD SKILLS

- Networking
- Microcontroller
- AI / Computer Vision
- Internet of Things (IoT)
- Cloud Computing

SOFT SKILLS

- Communication
- Adaptability
- Teamwork
- Problem Solving
- Responsibility

EXPERIENCE

PT PLN (Persero) - ULP Tambun

Jan 2023 - Mar 2023

Internship (Field Work Practice)

- Recorded and verified customer kWh data accurately and carefully
- Assisted in processing electricity usage data
- Supported administrative documentation related to meter recording

Laboratory Assistant – Information Systems Laboratory

2025 - Present

Gunadarma University

- Assisted students in learning Pascal (Lazarus) and VB.NET programming
- Guided practical sessions and explained programming concepts clearly
- Supported students in developing basic applications and completing assignments
- Prepared lab materials and ensured smooth execution of laboratory sessions

EDUCATION

Gunadarma University

2024 - Present

Computer System | GPA: 3.74/4.00

SMK Negeri 1 Cikarang Barat

2021 - 2024

Computer and Network Engineering (TKJ)

ORGANIZATION

Vice Chair – Karang Taruna Pemuda Blok R

2022 - 2023

- Coordinated youth community programs and activities
- Assisted in planning and executing community programs
- Managed team communication and ensured effective collaboration
- Contributed to organizing Independence Day (HUT RI) competition events

Student Association (HMSK)

- Managed internal and external organizational communication
 - Contributed to the development and management of member resources
 - Participated in planning and executing organizational programs
-

AWARDS & COMPETITIONS**Embedded System Competition – Multimedia and Robotics Research Center, Gunadarma University 2025****2nd Place – Drone Category**

- Programmed and operated a drone using a mobile-based drag-and-drop navigation system
 - Controlled drone movements (forward, backward, ascend, descend) with timed delays
 - Successfully completed all tracks and checkpoints with maximum score
 - Demonstrated precision control, problem-solving, and strong teamwork
-

CERTIFICATIONS & TRAINING**Computer Network Implementation - Gunadarma University (2025)**

- Learned network addressing, wireless network installation, and switch configuration
- Understood network device selection and basic networking setup
- Configured network addressing and basic network setup using Cisco Packet Tracer

Computer Network Requirements Identification - Gunadarma University (2025)

- Studied OSI Layer concepts and user technical requirements
- Learned network topology, equipment identification, and cable installation

Artificial Intelligence Fundamentals - Dicoding Indonesia (2025)

- Learned fundamental concepts of Artificial Intelligence, Machine Learning, and Deep Learning

Introduction to Secure Networking (Microsoft) - Coursera (2026)

- Learned networking fundamentals including TCP/IP and OSI models
 - Understood network security components, threats (DDoS), and mitigation strategies
 - Gained knowledge of network infrastructure and monitoring techniques
 - Explored concepts of cloud computing, Internet of Things (IoT), and network topology
-

PROJECT**Automated Fish Feeding System (Arduino-Based Embedded System)**

- Designed and developed an automated feeding system using Arduino UNO
- Configured scheduled feeding and controlled servo motor operations

Hand Gesture Recognition System with Audio Output (AI/Computer Vision)

- Developed a hand gesture recognition system using Python and OpenCV
- Integrated audio output using Google Text-to-Speech (gTTS) based on detected gestures

Drowsiness Detection System with Audio Alert (AI/Computer Vision)

- Developed a real-time drowsiness detection system using Python
- Implemented Eye Aspect Ratio (EAR) to detect eye closure
- Generated audio alerts (beep and voice warning) using gTTS

Early Fire Detection System with Email and Audio Notification (AI/Computer Vision)

Developed a real-time fire detection system using Python and OpenCV

- Detected fire indications through camera input
- Sent automated email notifications with screenshot evidence via SMTP (Gmail)
- Integrated audio alerts for real-time warning
- Performed testing and troubleshooting to improve detection accuracy
